## Scope of the Report

Attributes	Details
Title	The US Pest Control Market: Size, Trends & Forecasts (2021-2025 Edition)
Coverage	The US
Forecast Period of Market	2021-2025
Competition in the Market	Fragmented
Key Players	Rollins, Inc., Terminix Global Holdings, Inc., Rentokil Initial plc (Rentokil Steritech), and Ecolab Inc.

# The US Pest Control Market

## Executive Summary

A living individual animal, plant, or single-celled life form that causes harm for human as well as their harvests, livestock, forests, pets, etc. is called as a pest. The pest can be in any form such as, they can be a plant, animal or fungus.

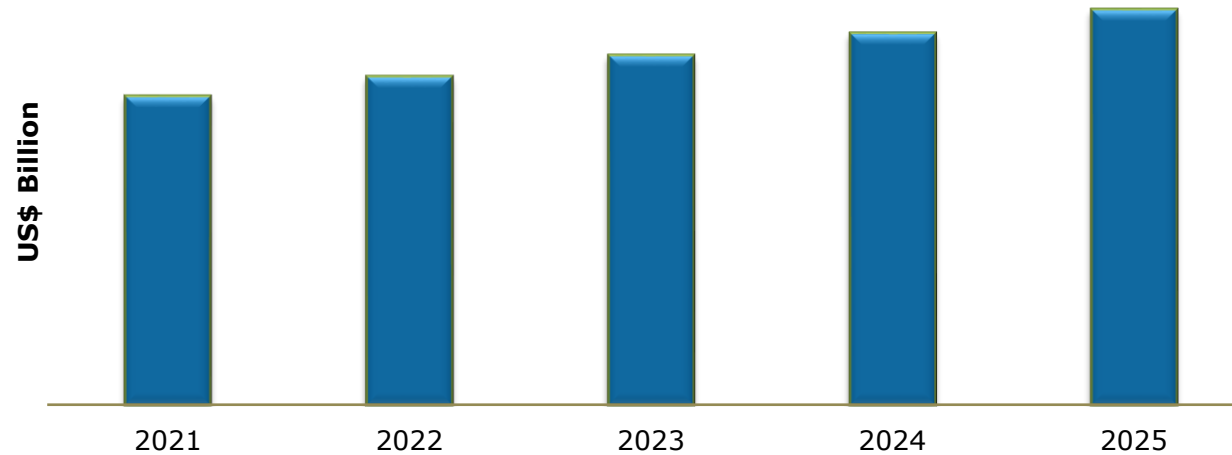

Pest control refers to the regulation or management of pests, a living organism that adversely impacts human activities. The pest control usually attempts to completely eradicate the pests, though the management and response of human depends on the damage done and degree of tolerance. Pest control is as old as agriculture, as there has always been a need to save crops from pests.

There are various pest control methods: in Agriculture, Horticulture and Forestry (Biological Pest Control, Cultural Control, Trap Cropping, Pesticides), in Homes and Cities (Physical Pest Control, Poisoned Bait, Fumigation, Sterilization) and on Airfields (Poisoned Bait, Sonic Nets). The pest control is segmented on the basis of different type, pest category and application. On the basis of type, pest control is classified as: Chemical, Mechanical, Biological and Others. On the basis of pest category, pest control is segmented as: Insects, Termites, Rodents and Others. There are various applications of pest control: Residential (Termite Control, Bedbug Control, Rat Control), Commercial (Healthcare Sector, Pharmaceutical Sector), Agricultural, Industrial and Others.

The US pest control market has increased at a significant CAGR over the past years and projections are made that the market would be growing at a healthy trade in the forecast period i.e. 2021-2025. The US pest control market is expected to increase due to growing disposable income per capita, increasing household expenditure, growing urban population, changing climatic conditions etc. Yet the market faces some challenges such as environmental effects, health issues, building resistance towards pesticides etc. Spike in Mergers and Acquisitions (M&A) activity, digital pest control, increasing consumer awareness and demand for vector control and shift towards organic farming are some of the latest trends in the US pest control market that have been captured in this report.
