Scope of the Report

Attributes	Details
Title	The US Rosacea Market: Size & Forecasts with Impact Analysis of Covid-19 (2021-2025 Edition)
Coverage	The US
Market Influencing Variables	Growth Drivers, Challenges, Market Trends
Forecast Period of Market	2021-2025
Competition in the Market	Dominated
Key Players	Vyne Therapeutics (Foamix Pharmaceuticals Ltd., Galderma, Sol-Gel Technologies Ltd., and Abbvie (Allergan Plc)

The US Rosacea Market

Executive Summary

Rosacea is a common disorder associated with skin and most prevalent among people with light skin tone, and mainly affects areas around the chin, cheeks, nose, and forehead. The main characteristic of this disease is solid-bumps and pus-filled pimples.

Rosacea is a common chronic condition of the skin with a high prevalence rate among the US population. It naturally begins at any time after the age of 30 or previously. In some cases, rosacea may also occur on the neck, chest, scalp or ears. Rosacea symptoms and signs include facial flushing, fine red vascular lines, swollen, red eyelids and many more. Currently, more than 16 million populations in the US are suffering from rosacea.

The US rosacea market has grown over the past few years and is projected to grow at a high growth rate on the back of rising incidence of disease, and aging population. The growth in the market will be driven by unhealthy eating habits and environmental factors, rising disposable income, ageing population, escalating healthcare expenditure, high prevalence of rosacea, etc. Yet the market growth is restrained by factors such as lack of awareness and knowledge and stringent government regulations for the approval of new drugs.

The Covid-19 pandemic has led to decline in appointments for rosacea with dermatologists mainly due to travel restrictions. Thereby, impacting the market growth negatively as far as 2020 is concerned.
