Global Body Contouring Market: Coverage

Scope of the Report

Attributes	Details
Title	Global Body Contouring Market: Size, Trends & Forecasts (2018-2022)
Coverage	Global and Regional
Regional Coverage	North America, Asia Pacific, Europe, South America
Market Influencing Variables	Growth Drivers, Challenges, Market Trends
Forecast Period of Market	2018-2022
Competition in the Market	Fragmented
Key Players	Allergan Plc., Cutera, Inc., Hologic, Inc., Merz Pharma GmbH & Co. KGaA

Global Body Contouring Market

Executive Summary

Aesthetic service can also be called as Aesthetic medicine, it involves any specialty that includes the process of modifying a patient's physical appearance. The major application of aesthetic services are anti-aging and wrinkles, facial & skin rejuvenation, vascular lesions, body shaping and cellulite, breast enhancement, scars, pigment lesions, tattoo removal and vitiligo. Broadly, aesthetic service can be categorized into four major segments such as Body Contouring, Energy Devices, Fillers, Breast Implants and Cosmeceuticals.

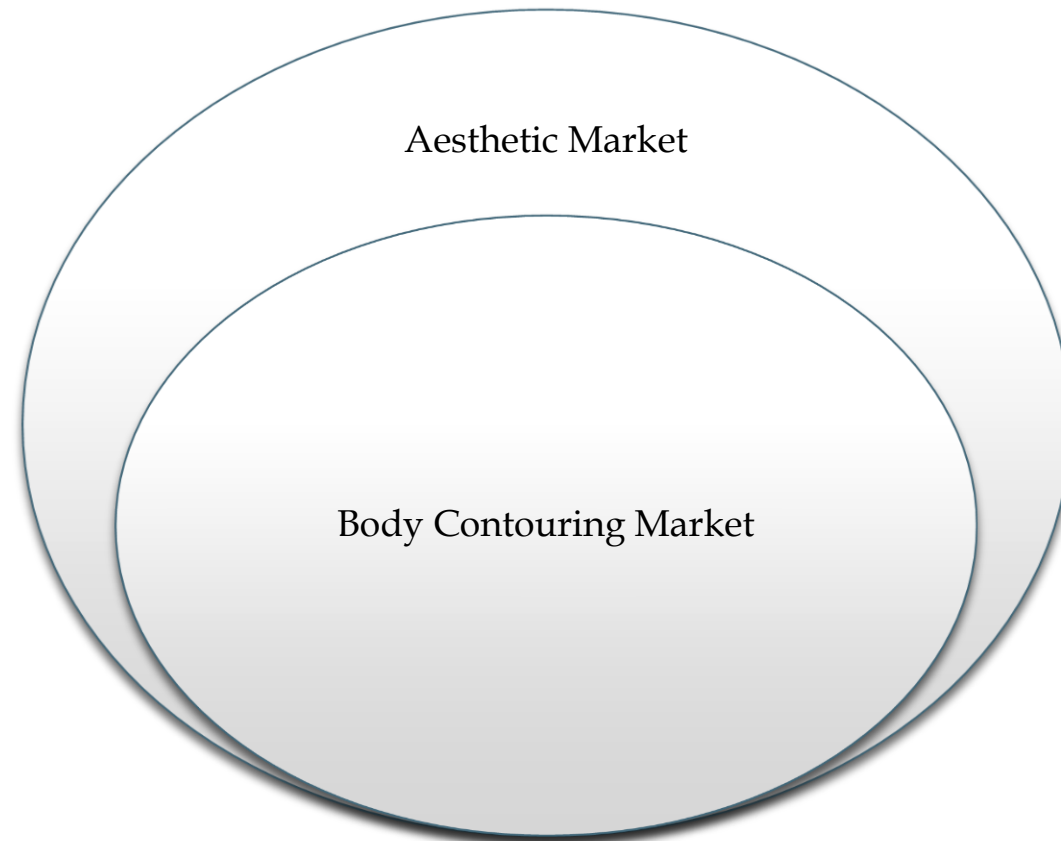

Body contouring is an aesthetic treatment option for patients who wants to modify their physical appearance. Body contouring is defined as the practice to modify the shape of the human body, therefore it also called as body shaping. The common part of the body which can be addressed with body contouring are face and neck, upper arms, breasts, abdomen, waistline and back, thighs and calves. Body contouring can further be divided into two type named as Invasive body contouring and non-invasive body contouring.

Invasive procedures comprise surgical procedure to reduce gained or accumulated fat to obtain desirable body structures. It includes procedures such as bariatric surgery, arm lift or brachioplasty, breast lift or mastopexy, stomach lift or abdominoplasty and lower body lift. Nonsurgical (non-invasive) body shaping techniques require minimal contouring, although it is important to have minimal expectations for these procedures. The minimally invasive body contouring procedures also include non-invasive body contouring as, it includes nominal invasion in the procedure.

The global body contouring market is expected to increase at high growth rates during the forecasted period (2018-2022). The global body contouring market is supported by various growth drivers, such as, upsurge in obese population, growing bariatric surgery worldwide, rising disposable income, etc.
