The US Endoscopy Device Market

Executive Summary

Endoscopy is a clinical process which is used for checking the patient's alimentary-canal. An endoscope is a device to check the inner parts of human body and all this procedure is known as endoscopy. An endoscope consist of a flexible tube along with an attached light and camera, through which the doctor or surgeon can see images of a person's alimentary-canal on a screen. Endoscopes are utilized for diagnostic and therapeutic motives. In the process of upper endoscopy, an endoscopy device is easily passed by the mouth and neck of the patient and into the larynx, permitting the surgeon to see the larynx, abdomen, and top area of the small intestine. Likewise, endoscopy device can be passed by the gut in the bowel to investigate the issues of that part of the intestine.

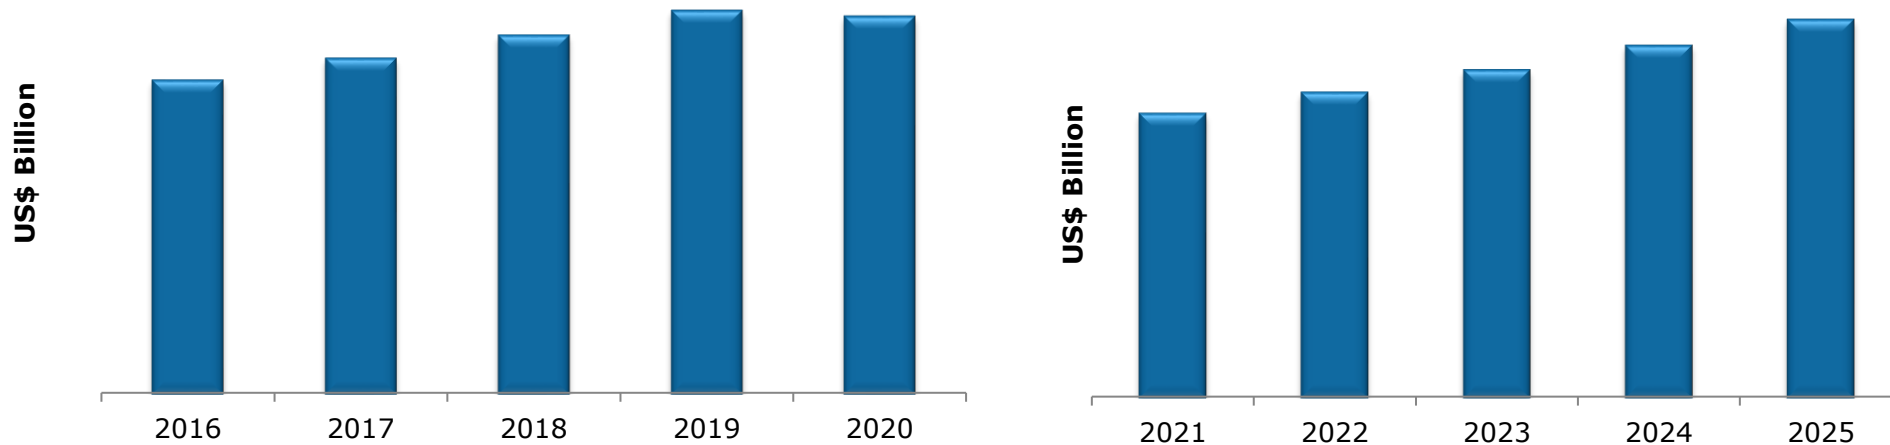

The US endoscopy device market can be segmented on the basis of products, endoscopes, endoscopy visualization components, endoscopy visualization systems and operating devices; and on the basis of endoscopes, such as flexible endoscopes, rigid endoscopes, disposable endoscopes, capsule endoscopes and robot assisted endoscopes

The US endoscopy device market has increased significantly during the historical period and projections are made that the market would rise in the next four years i.e. 2021-2025 tremendously. The endoscopy device market is expected to increase due to aging population, growing gross national income, increasing prevalence of cancer cases, increasing healthcare spending worldwide, growing urbanization and increasing health consciousness among people. Yet, the market faces some challenges such as high cost of endoscopy procedure & equipment and unfavorable reimbursement policies in developing countries.

The COVID-19 pandemic had a mixed effect on the US endoscopy device market. It negatively affected the market in 1st and 2nd quarter but the market picked up in 3rd and 4th quarter. At the end of 2020, the pandemic had a slight negative impact on the market.

Endoscopy Device Market: Global Analysis
