# The US Arms and Ammunitions Market: Coverage

## Scope of the Report

Attributes	Details
Title	The US Arms and Ammunitions Market: Size, Trends & Forecasts (2018-2022)
Coverage	Regional
Regional Coverage	The US
Market Influencing Variables	Recent Industry Developments, Regulatory Structure, Market Drivers, Key Issues, Political Environment, Macroeconomic Indicators
Forecast Period of Market	2018-2022
Competition in the Market	Fragmented
Key Players	General Dynamics Corp., Vista Outdoor, Inc., Remington Outdoor Company

# The US Arms and Ammunitions Market

## Executive Summary

Manufacturing weapons and associated technology and equipment are a part of firearms and ammunition industry. This involves research, development and production of firearms and fall under the category of commercial sector. The task of industry operators includes designing and manufacturing of small arms, bombs, ordnances, ammunitions, artillery and related parts.

A firearm is a mechanical device that uses pressure from a burning powder to force a bullet through and out of a metal tube; a weapon, especially a pistol or rifle, capable of firing a projectile and using an explosive charge as a propellant.

Modern ammunition varies depending on the type of firearm. Rifles and handguns use a cartridge containing a single bullet.

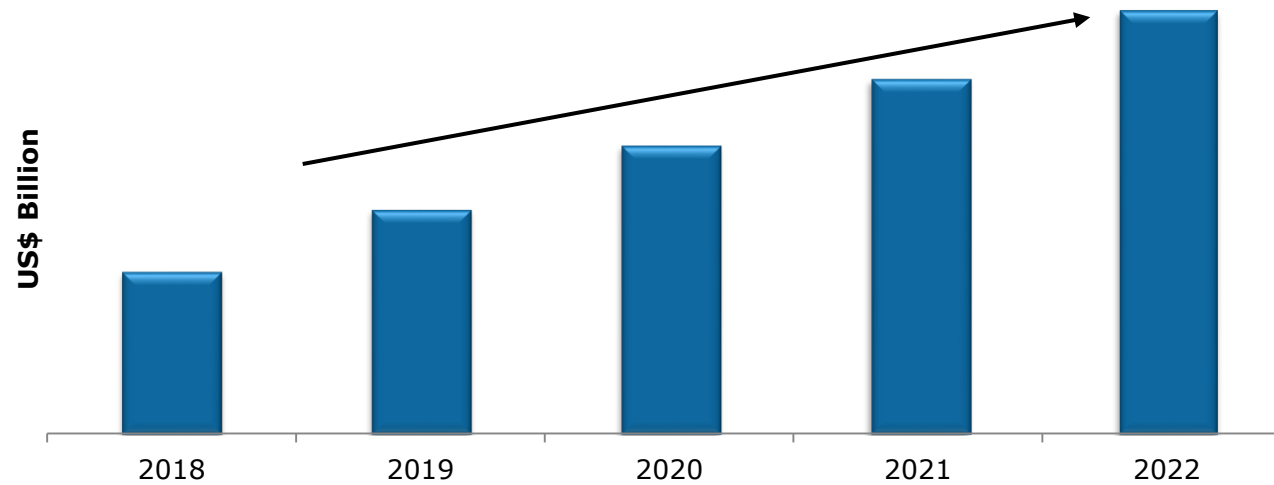

On the basis of product and services, firearms and ammunition industry can be broadly categorized into four types: small arms and machine guns, small arms ammunition, other ammunition and ordnance & accessories. On the basis of major end-users of the firearm and ammunition include export, military, and civilians and law enforcement.

Standard Industrial Classification (SIC) Codes are the numerical codes, assigned by the US government to business establishments. These are four digit codes, which are used to identify the primary business of the establishment (company).

The US Arms and Ammunitions market has increased at a significant CAGR during the years 2015-2017 and projections are made that the market would rise in the next four years i.e. 2018-2022 tremendously. The US arms and ammunitions market is expected to increase due to increasing investments in industry and increasing exports of arms and ammunitions, etc. Yet the market faces some challenges such as, illegal sales of weapons and firearms, etc.
