Global Sack Paper Market: Coverage

Executive Summary

Sack paper is a packaging type that can be constructed of one or several layers of high quality kraft paper, usually produced from virgin fiber. It is a special grade built to suit a very specific demand for the industry. Sack paper is made from renewable resources such as paper and paperboard that provide distinct environmental sustainability credentials. Thus, it is environmental-friendly, sturdy and keeps the product in a well condition. The global sack paper market was valued at US\$32.27 billion in 2021 and is projected to reach US\$41.76 billion by 2027. Furthermore, the global sack paper market by demand is expected to reach 4.80 million tons in 2027, increasing from 4.19 million tons in 2021.

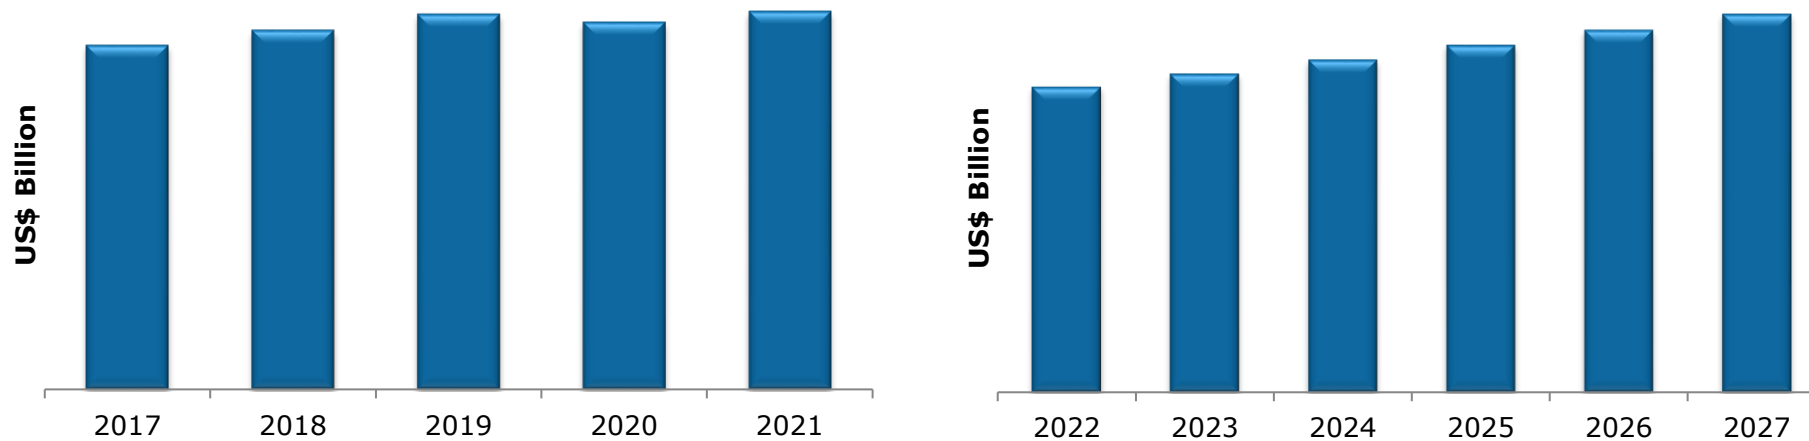

The sack paper market can be segmented on the basis of grade (brown sack paper and white sack paper). On the basis of grade, brown sack paper held around 56% of the share in sack paper market in 2021. While the white sack paper is anticipated to grow at a significant CAGR during the forecasted years. Asia Pacific leads the market with a share of 35% in the global sack paper market in 2021.

At the onset of COVID-19, global demand for sack paper declined sharply in the wake of closures of non-essential businesses and lockdowns in many parts of North America, Europe, and Asia which pushed the companies to take a series of measures to mitigate the financial impacts, including an extensive production curtailment, reduced capital spending, and disciplined cost management initiatives.

The global sack paper market has increased in 2021 and projections are made that the market would rise in the next five years i.e. 2022-2027 tremendously. There is a rapid growth of sack papers in recent years owing to growing demand for biodegradable packaging. Kraft paper is one of the emerging segments of the biodegradable packaging industry, because it is highly durable and strongest that can be used on occasions where maximum strength is required. Therefore, growth in the biodegradable packaging industry is likely to propel the growth of the global sack paper market in coming years. Further, the market is expected to increase due to rapid urbanization, growth in grocery retail sales, acceleration in demand for agricultural fertilizer, etc. In recent years, yet the market faces some challenges such as, rising focus on bio-plastics, etc.
