

# Global Biopreservation Market: Size, Trends & Forecasts (2016-2020)

October 2016

# Global Biopreservation Market Report

## Scope of the Report

The report titled "Global Biopreservation Market: Size, Trends & Forecasts (2016-2020)", provides an in-depth analysis of the global biopreservation market by value and by segments.

The report provides an analysis of biopreservation market by region; North America and Asia Pacific.

The report also assesses the key opportunities in the market and outlines the factors that are and will be driving the growth of the industry. Growth of the overall global biopreservation market has also been forecasted for the period 2016-2020, taking into consideration the previous growth patterns, the growth drivers and the current and future trends.

The competition in the global biopreservation market is fragmented with several players, such as Biolife Solutions, Inc., VWR International, QIAGEN, Panasonic Technologies, Biocision, Thermo Fisher Scientific, Inc etc. Further, the key players of the global biopreservation market: Biolife Solutions, Inc., VWR International, QIAGEN and Thermo Fisher Scientific, Inc. are profiled with their financial information and respective business strategies.

## Country Coverage

North America

Asia Pacific

## Company Coverage

Biolife Solutions, Inc.

QIAGEN

Thermo Fisher Scientific, Inc.

VWR International

# Global Biopreservation Market Report

## Executive Summary

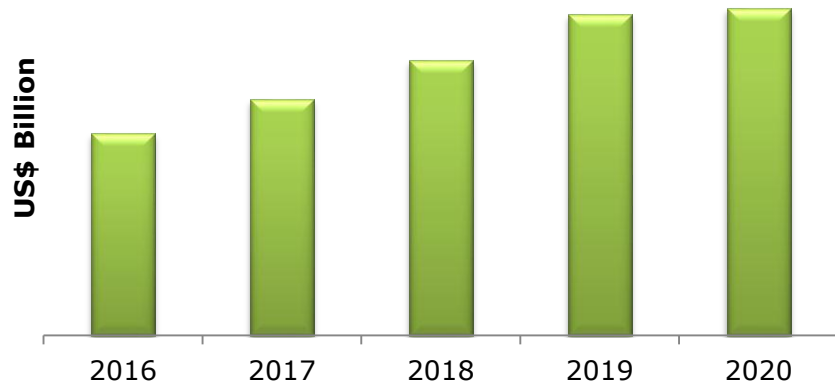

Biopreservation is preserving the human biological samples also known as biospecimen in the cultured and stable environment for retaining the functionality of the samples intended to be used for various research purposes. Cells, tissues, plasma, urine, saliva, organs, and other body fluids are the type of samples that are preserved for a specific duration. The biopreservation market can be segmented on the basis of product type and on the basis of application.

The biopreservation market by product type has the following sub segments: equipment market, media market and laboratory information management system (LIMS). The biopreservation market by application can be classified into: biobanking, regenerative medicine and drug discovery.

Global biopreservation market has increased at a significant CAGR during the years 2011-2015 and the projections are made that the market would rise tremendously in the next four years i.e. 2016-2020. The growth of the global biopreservation market is expected due to increasing healthcare expenditure, increasing chronic diseases, rapidly mushrooming biorepositories and the increment in personalized medicines. Yet, the market faces some challenges such as risk in sample custody, management issues of biospecimens, need to develop the preservation methods and compromised biospecimen information.

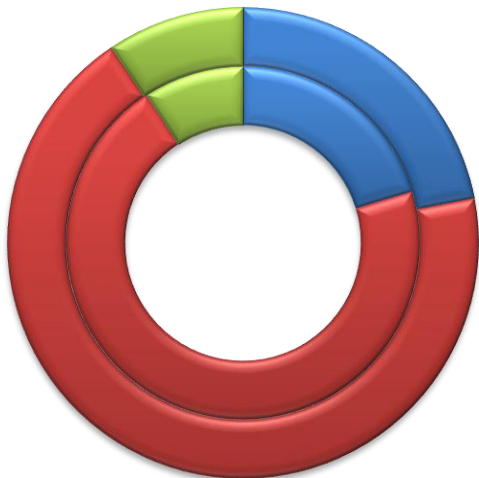

# Global Biopreservation Market Overview

Global Biopreservation Market by Value;  
2016-2020 (US\$ Billion)

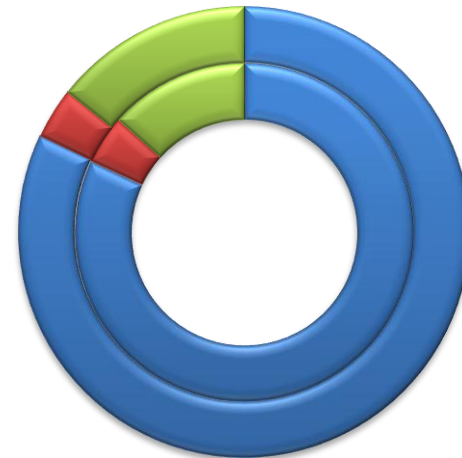

The global biopreservation market is estimated to increase to US\$....billion by 2020 as compared to US\$...billion by 2016. The market is estimated to grow at a CAGR of ...% over the years 2016-2020. The biopreservation market by product type incorporates ...., ..... & .... as the segments. The equipment market share was dominant at ....%in 2015 and this share is further expected to rise to .....% by 2020. The biopreservation market by application can be segregated into ...., ..... & .....

Global Biopreservation Market by Application;  
2015 & 2020 Percentage (%)

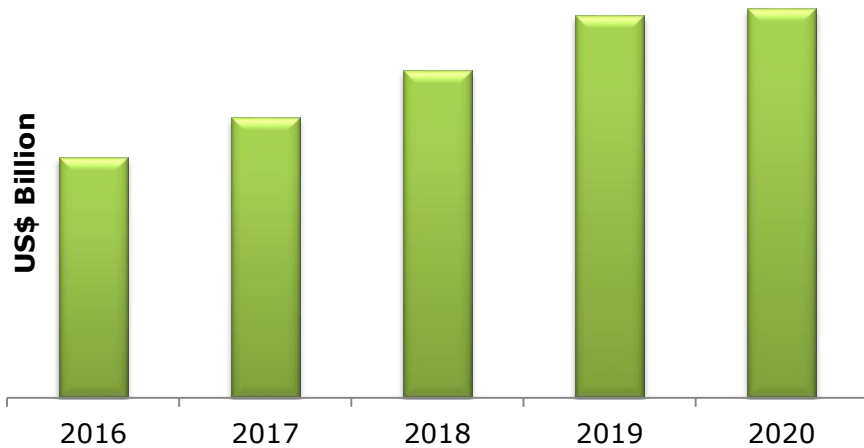

Global Biopreservation Market by Product Type;  
2015 & 2020 Percentage (%)

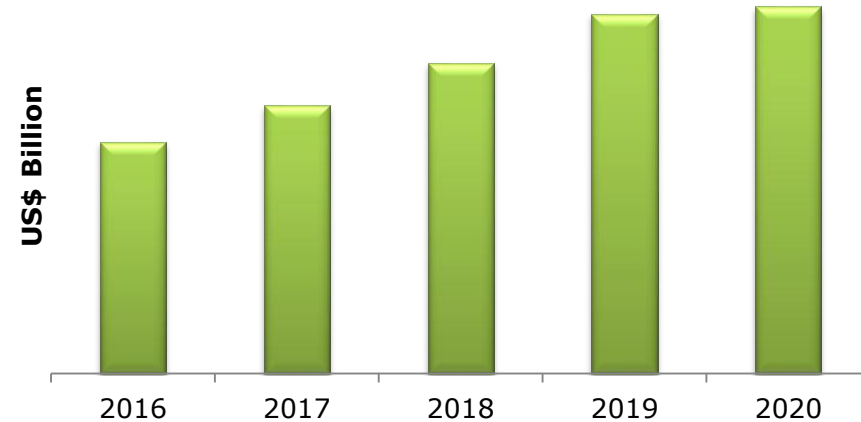

# Global Biopreservation Market Segments Overview

## Global Biopreservation Equipment Market by Value; 2016-2020 (US\$ Billion)

## Global Biobanking Market by Value; 2016-2020 (US\$ Billion)

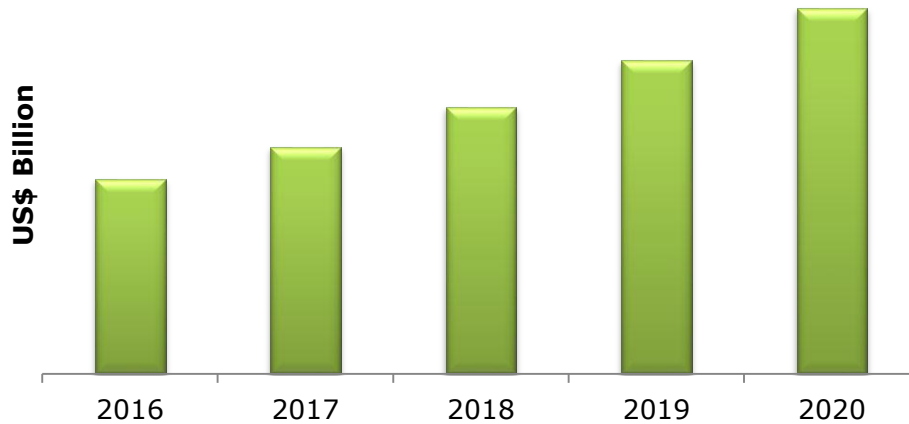

## Global Biopreservation Media Market by Segments; 2015 & 2020 Percentage (%)

The global biopreservation equipment market was valued at US\$.... billion in 2015, showing a consistent increasing trend from US\$... billion in 2011. The market is projected to further rise to US\$.... billion by 2020 as compared to US\$.... billion in 2016. The global media market can further be classified into .... market and the .... market. The ... market had a dominant share of ...% in 2015, followed by the ... market with a share of ...%. The value of the market is projected to increase to US\$... billion by 2020 in comparison to US\$... billion in 2016.

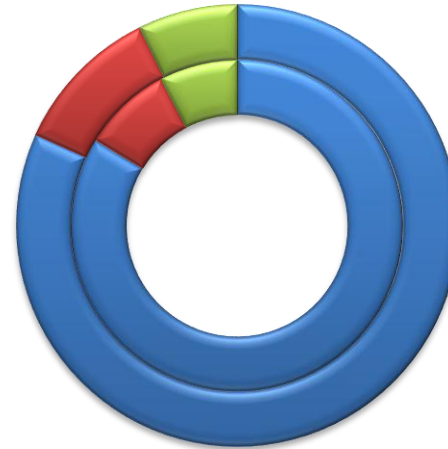

# Biopreservation Market: Regional Overview

North America Biopreservation Market by Value; 2016-2020 (US\$ Billion)

The North America biopreservation market is estimated to reach US\$... Billion by 2020 as compared to US\$.. Billion by 2016. The market is estimated to grow at a CAGR of ...% over the years 2016-2020. The North America biopreservation market can be segmented into ..., ... &.... The dominant share is of ... market by ....% share in 2020. The Japan & China biopreservation market is estimated to rise to US\$... Million by 2020.

North America Biopreservation Market by Segments; 2015 & 2020 Percentage (%)

Japan & China Biopreservation Market by Value; 2015-2020 (US\$ Million)
