Executive Summary

Play is the mechanism by which children learn and experience their world engaging in activities that encourage their cognitive, emotional and social development. With children opting for more innovative toys, the toys market has been influenced by changing consumer tastes and interests. The market is highly characterized by fluctuations which are seasonal and trend driven in nature. Toys market aimed at preschoolers being offered with wide range of choices is considered to be a promising segment. The best toys are those which are selected based on their appropriateness for a child's age, development and interests.

The demand for toys has undergone a dramatic change. The concept of "edutainment" toys has emerged. Toys no longer just fulfill the entertainment requirements of a child, but also cater to the growing needs of skill development of children. Through technology, toys are being made more educational and engaging. The global toys market is characterized by licensing agreements between the companies, offering innovated and eco friendly toys to the customers.

Global Toys Market: An Overview

Manufacturers need to adapt themselves to the fickle tastes of both children and parents while focusing on innovation and technological advancements. The seasonal and trend driven fluctuations in global toy market makes forward planning vital for both manufacturers and retailers.
