Global Contact Lens Market

Executive Summary

Contact lenses are thin lenses that are worn directly on the cornea of the eye. Contact lens help in correcting refractive errors and thus improves vision in numerous conditions such as myopia, hyperopia, presbyopia, etc. Contact lenses are also used for cosmetic purpose for changing the appearance of the eyes. However, there are certain risks associated with the use of cosmetic contact lenses such as eye pain, bacterial infections, corneal ulcers, vision damage, etc.

Contact lenses have been segmented on the basis of product, design, modality and application. Based on product type, contact lenses have been divided into soft lens, rigid gas permeable (RGP) lens and hybrid lens. On the basis of design, contact lenses have been segregated into spherical, toric, multifocal and others. Applications of contact lens include corrective, therapeutic, cosmetic and prosthetic. Based on modality, contact lenses have been divided into two broad categories: daily and reusable.

Cosmetic contact lenses have been further segmented on the basis of product and material. On the basis of product type, cosmetic contact lenses have been divided into circle and colored. Based on material, cosmetic contact lenses have been distributed into hydrogel and polymer.

The global contact lens market has witnessed continuous growth in the past few years and is projected to grow even further during the forecast period (2021-2025). The market is expected to be driven by various growth enhancing factors such as increasing purchasing power, rising demand by young generation, increasing demand for cosmetic lenses in the entertainment industry, etc. However, the market is not free from challenges that are hindering its growth. Some of the major challenges faced by the market are presence of counterfeit products and lack of awareness among consumers.
