# Global Analytical Laboratory Instrument Market: Coverage

## Scope of the Report

Attributes	Details
Title	Global Analytical Laboratory Instrument Market: Size & Forecasts with Impact Analysis of COVID-19 (2021-2025)
Coverage	Global and Regional
Regional Coverage	North America, Asia Pacific, Europe and Rest of the World
Market Influencing Variables	Growth Drivers, Challenges, Market Trends
Forecast Period of Market	2021-2025
Competition in the Market	Fragmented
Key Players	Thermo Fisher Scientific, Danaher Corporation, Agilent Technologies, Waters Corporation

# Global Analytical Laboratory Instrument Market

## Executive Summary

Analytical laboratory instrument or equipment or devices are products utilized for analytical usage in biology, pharm, medical, food-manufacturing laboratories and oil refineries. The equipment or device assists in examination of matter and founding the composition. Few examples of the analytical laboratory instrument are refractometer, electrochemical instrument, conductivity meter, automatic density meter, automatic titrators, colony counter, and more.

The analytical laboratory instrument market can be segmented on the basis of types, elemental analysis, molecular analysis, separational analysis and others. The analytical laboratory instrument market can also be divided on the basis of end-users, pharmaceutical, biotechnology, research & academic institutes, environmental testing, food beverage testing, petrochemical and others

The analytical laboratory instrument market has increased significantly during the years 2016-2020 and projections are made that the market would rise in the next four years i.e. 2021-2025 tremendously. The analytical laboratory instrument market is expected to increase due to accelerating investment in biotech, growing R&D in pharmaceutical, aging population, increasing prevalence of cancer cases, increasing CO2 emissions and rising proteomics market. Yet, the market faces some challenges such as reduction in free trade, high cost of instruments and high degree of competition.

The COVID-19 pandemic had a positive impact on global analytical laboratory instrument market. It negatively affected the market in 1st and 2nd quarter but the market picked up in 3rd and 4th quarter. The pandemic would create a positive impact in the future of the market too as increased research on virus require high-end analytical laboratory instrument.
