The US Anesthesia Drugs And Devices Market: Coverage

Executive Summary

Anesthesia is the use of medicines to prevent pain during surgery and other procedures. They may be given by injection, inhalation, topical lotion, spray, eye drops, or skin patch. Anesthesia can cause one to have a loss of feeling or awareness. An anesthesia machine is a medical device used to generate and mix a fresh gas flow of medical gases and inhalational anesthetic agents for the purpose of inducing and maintaining anesthesia. The US anesthesia drugs and devices market was valued at US\$5.99 billion in 2021 and is projected to reach US\$8.88 billion by 2027.

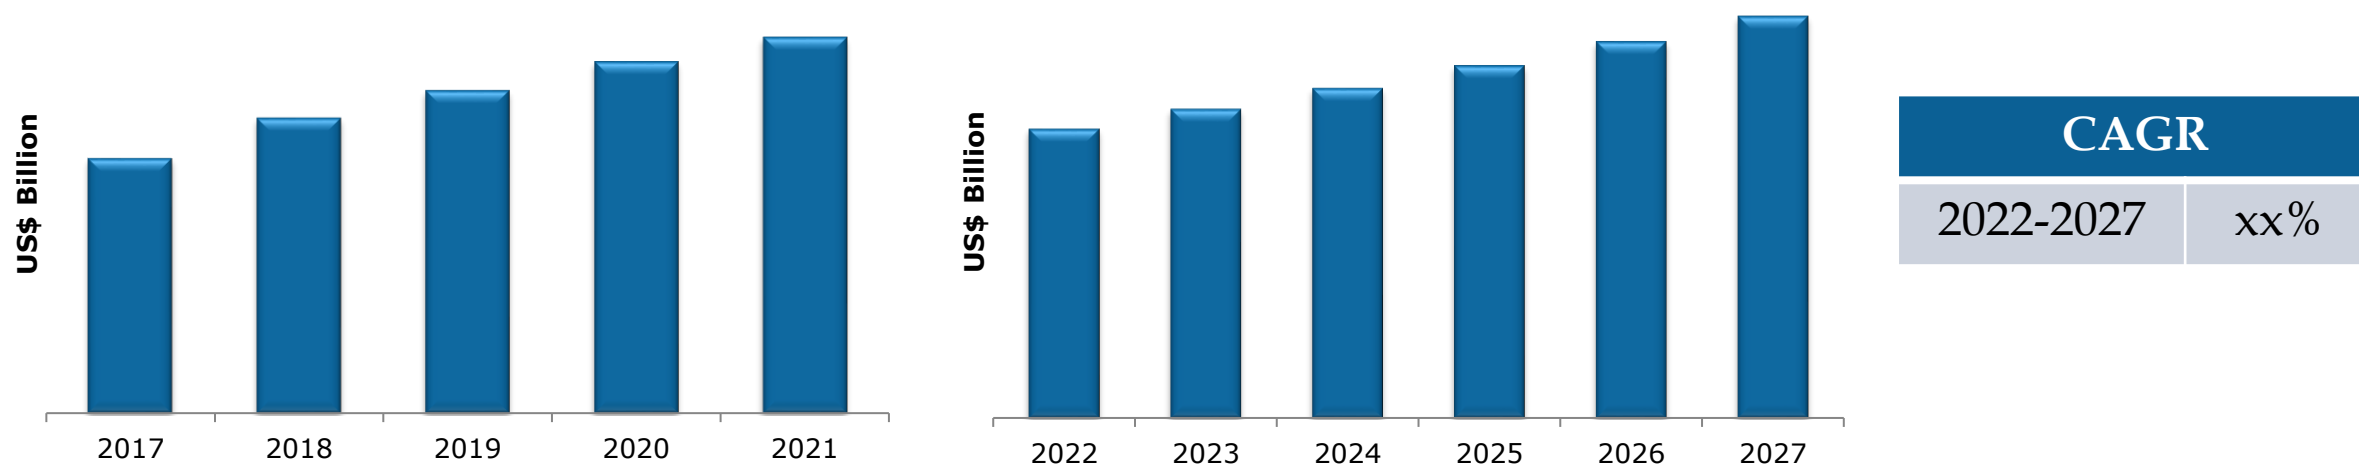

The US anesthesia drugs and devices market can be segmented on the basis of segment (anesthesia drugs and anesthesia devices). On the basis of segment, anesthesia drugs segment held around 55% of the share in the US anesthesia drugs and devices market in 2021. The anesthesia drugs segment is further segmented on the basis of type (general, local and other anesthesia). On the basis of type, general anesthesia held around 39% of the share in the US anesthesia drugs market in 2021. The local anesthesia drug is further segmented on the basis of product (Bupivacaine, Ropivacaine, Lidocaine, Chloroprocaine, Prilocaine, Benzocaine and Other Local Anesthetics). On the basis of product, Lidocaine held 32% of the share in local anesthesia drug market in 2021. Also, the anesthesia devices segment can be segmented on the basis of product (advanced, basic and integrated). On the basis of product, advanced anesthesia held around 62% of the share in the US anesthesia devices market in 2021.

Due to the emergence of the COVID-19 pandemic situation, demand for anesthesia drugs decreased slightly in 2020, resulting in surgeries being postponed or canceled. However, as activities resume, all of the elective surgeries that had been postponed are now being completed, increasing anesthesia drug consumption.

The US anesthesia drugs and devices market has increased in 2021 and projections are made that the market would rise in the next five years i.e. 2022-2027 tremendously. Increasing number of surgeries, aging population with increasing chronic conditions, and advancements in anesthesia technologies are driving the US anesthesia drugs and devices market over past years. Yet the market faces some challenges such as, lack of skilled anesthesiologist, etc.
