Global Geriatric Care Devices Market

Executive Summary

Geriatric care includes a wide range of products and services that are provided with long-term care to elderly people with an objective to enhance their quality of life. Geriatric care devices are those devices that help elderly people in listening, reading, moving and performing day-to-day activities despite their physical and cognitive decline. These devices help the elderly patients to live comfortably, safely and independently.

Geriatric care devices can be used in different applications, including dressing, bathing, grooming, toileting, lifting, and transfer. Most common geriatric care devices include walking canes, walkers, wheelchair, hearing aids, adult diapers, bed handles, uplift seating devices, medical alert devices, and adaptive switches.

Geriatric care devices are considered to be very beneficial as it improves the quality of life of geriatric patients, enhances convenience and health outcomes, reduces healthcare costs, provides safety, offers maximum support for independent living, and boosts self confidence among elders.

The geriatric care devices market can be segmented on the basis of product (Mobility Assistive Devices, Adult Diapers, Assistive Furniture, and Others); and end-user (Hospitals, Homecare, Elderly Nursing Homes, and Others).

The global geriatric care devices market has increased significantly during the years 2017-2019 and projections are made that the market would rise in the next four years i.e. 2020-2024 tremendously. The geriatric care devices market is expected to increase due to growing geriatric population, escalating healthcare spending, rising incidence of chronic diseases among geriatric population, rapid urbanization, favorable government initiatives, etc. Yet the market faces some challenges such as high cost involved, regulatory compliance, etc.
