Scope of the Report

Attributes	Details
Title	Global Medical Imaging Equipment Market: Size, Trends & Forecasts (2021-2025 Edition)
Coverage	Global and Regional
Regional Coverage	APAC, Americas, Europe Middle East & Africa (EMEA),
Market Influencing Variables	Growth Drivers, Challenges, Market Trends
Forecast Period of Market	2021-2025
Competition in the Market	Dominated
Key Players	Siemens AG (Siemens Healthineers), General Electronics (GE), Philips and Canon

Global Medical Imaging Equipment Market

Executive Summary

Medical imaging is a technique or a method of digital representation of the internal organs of the body, so that physician may diagnose the diseases associated to body. The various type of medical imaging technology delivers different information allied with potential disease, injury or gives the idea about the delivered medical treatments.

Medical imaging techniques are less invasive or absolutely non-invasive and it provides help to the doctors to look into the body and to understand the possible diseases or injury. The various medical imaging techniques are: X-ray Radiography, Magnetic Resonance Imaging (MRI), Medical Ultrasonography, Computed Tomography and Fluoroscopy

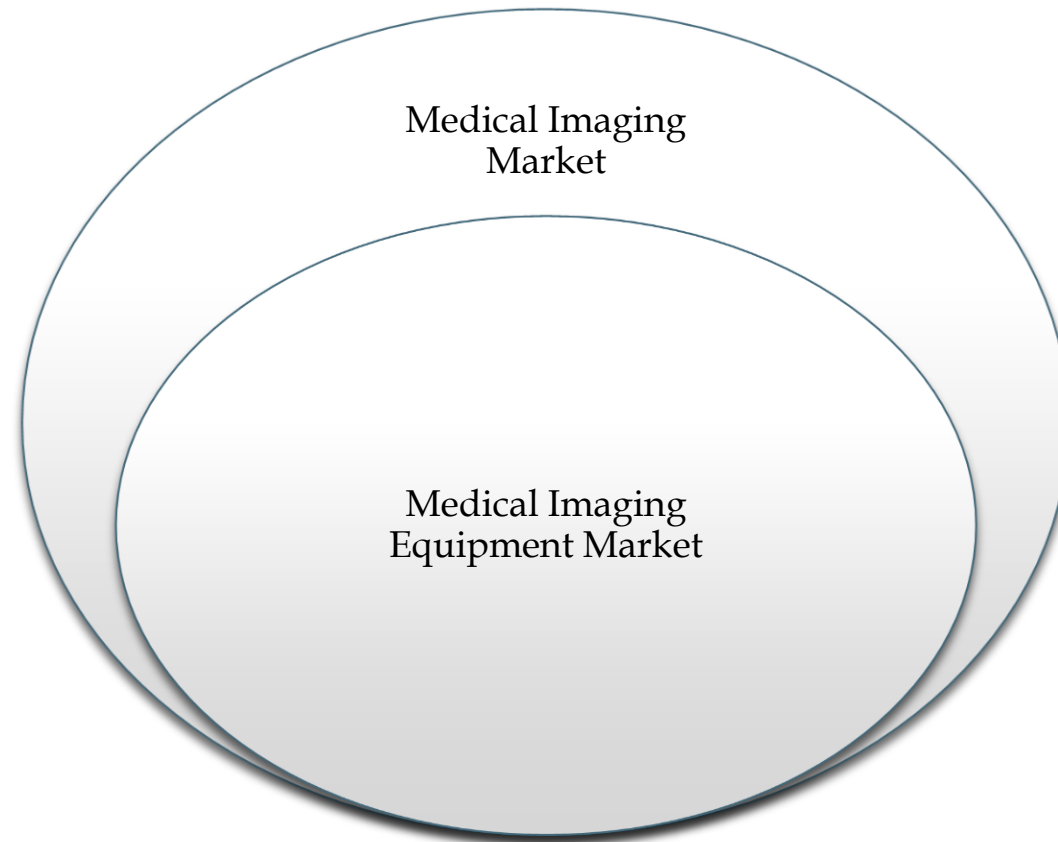

The medical imaging can be segmented on the basis of end user such as, hospital, independent diagnostic centers and ambulatory health care. Additionally, medical imaging can also be divided on the basis of application named as, Obstetrics/Gynecology health, Orthopedics Musculoskeletal, Neuro and Spine, Breast Health and General imaging.

The global medical imaging equipment market has witnessed continuous growth in the past few years and is projected to grow even further during the forecast period (2021-2025). The market is expected to be driven by various growth enhancing factors such as increase in geriatric and obese population, rising healthcare spending, increasing ratio of chronic diseases, increasing life expectancy etc. However, the market is not free from challenges that are hindering its growth.

Some of the major challenges faced by the market are shortage of helium, high cost treatments, deficiency of skilled radiologist, regulatory issues and safety issues are associated with medical imaging.
