Attributes	Details
Title	Global Folic Acid Market: Analysis By Form (Soft Gels, Tablets, Lozenges and Others), By Source (Synthetic and Natural), By Application (Food & Beverages, Pharmaceuticals, Nutraceuticals and Others), By Distribution Channel (Offline and Online), By Region Size and Trends with Forecast up to 2030
Coverage	Global and Regional
Regional Coverage	North America, Europe, Asia Pacific and Rest of the World
Market Influencing Variables	Growth Drivers, Challenges, Market Trends
Forecast Period of Market	2025-2030
Competition in the Market	Moderately Fragmented
Key Players	BASF SE, DSM-Firmenich AG, Merck KGaA, Zydus Lifesciences Limited, Lonza Group AG, Medicamen Biotech Limited, Emcure Pharmaceuticals Limited, Jiangxi Tianxin Pharmaceutical Co., Ltd., Xinfu Pharmaceutical Co., Ltd., Parchem Fine & Specialty Chemicals, Xinjiang Wujiaqu Xingnong Cycle Chemical Co., Ltd., Hebei Jiheng Group Pharmaceutical Co. Ltd and Nantong Changhai Food Additive Co., Ltd.

Global Folic Acid Market: Coverage

Executive Summary

Folic acid is the synthetic form of vitamin B9, an essential nutrient that helps the body make healthy red blood cells, supports DNA synthesis, and is especially important during pregnancy to prevent neural tube defects in developing babies. It is commonly added to supplements and fortified foods to treat or prevent folate deficiency and related health conditions. The global folic acid market in 2024 was valued at US\$1.11 billion. The market value is expected to reach US\$1.57 billion by 2030, growing at a CAGR of 5.88% during the forecast period of 2025-2030.

The global folic acid market can be segmented based on form (Tablets, Soft Gels, Lozenges and Others); source (Synthetic and Natural); application (Food & Beverages, Pharmaceuticals, Nutraceuticals and Others); and distribution channel (Offline and Online). Among the form, tablets segment held the major share in 2024 owing to their convenience, precise dosage, longer shelf life, and widespread consumer preference for easy-to-administer oral supplements. Additionally, tablets are cost-effective to produce and distribute, making them the most accessible form for both consumers and healthcare providers. North America is leading the global folic acid market, accounting for the majority of the market share.

The global folic acid market observed progressive growth in the past few years and anticipations are made that during the forecasted period (2025-2030), the market would further augment at an escalating growth rate. The global market growth is predicted to be supported by numerous growth drivers such as increasing demand for prenatal vitamin supplements, rising prevalence of nutritional deficiencies and anemia, expansion of government-led food fortification initiatives, growth in nutraceuticals and fortified foods sector and many other factors. Conversely, the market growth would be negatively impacted by various challenges such as overconsumption risks and regulatory constraints, price volatility of raw materials, etc. Moreover, the market growth would succeed in various market trends like rise of personalized nutrition and e-pharmacy channels, escalating demand for functional feed additives, surge in nutricosmetics and beauty-from-within products, heightened emphasis on infant nutrition, innovations in delivery formats and biotechnology, etc.
