Global Trust and Corporate Service Market: Coverage

Executive Summary

The trust and corporate services provide a broad range of administration services to lend assistance to its clients with an objective of setting up, structuring, and managing their financial and investment decision. The trust and corporate service market is mainly focused on stable countries with high regulations. The global trust and corporate services market was valued at US\$11.39 billion in 2022. The market value is expected to reach US\$15.25 billion by 2028, growing at a CAGR of 4.98% over the projected period of 2023-2028.

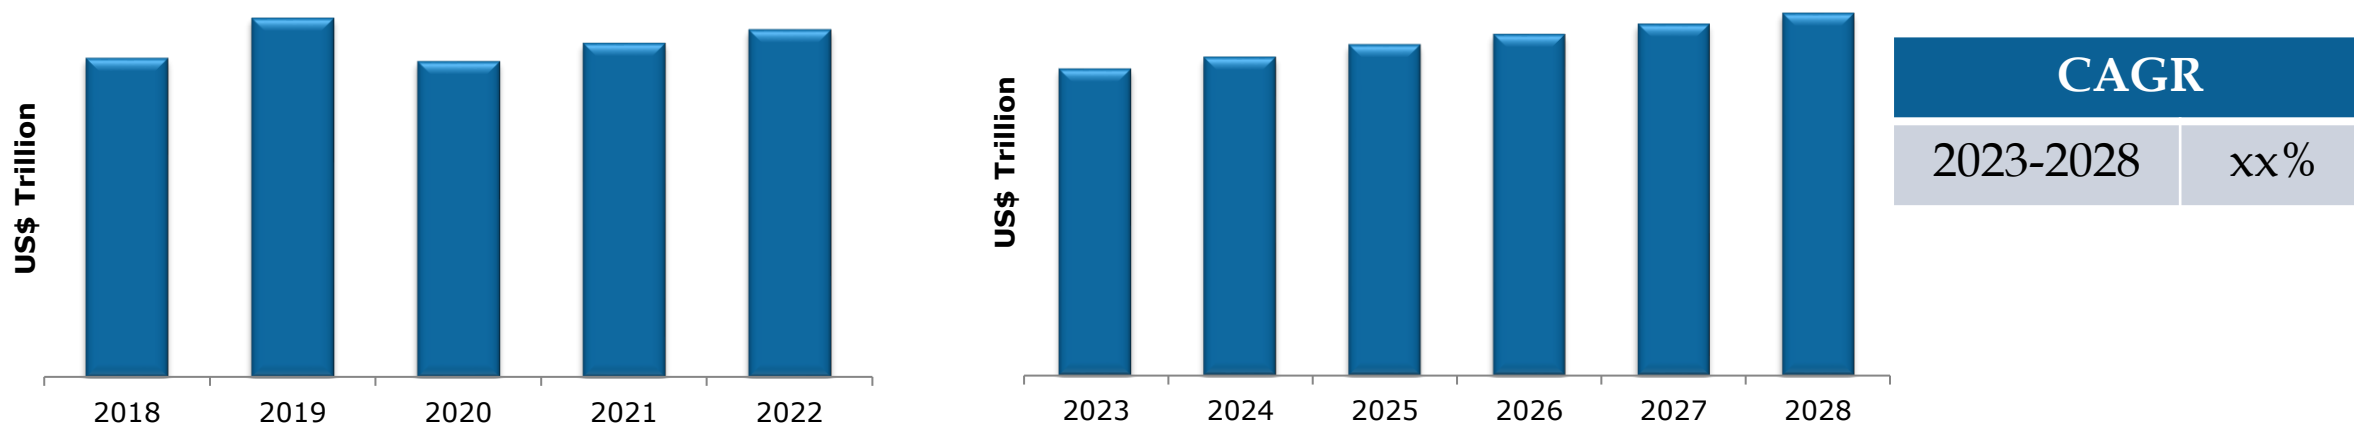

The global trust and corporate services market can be bifurcated based on following segments (Corporates, Funds SPV, High Net-worth Individuals, and Others). Corporates held the major share of the market, whereas funds SPV is expected to be the fastest-growing segment in the forthcoming years. North America held the major share of the market in 2022.

The COVID-19 pandemic has led to a considerable decline in business activities and hence a decline in the income of individuals. Therefore, demand for trust and corporate service providers observed a hit as the numbers of high-income-generating individuals plummeted. This has led to a slowdown in the demand for experienced personnel's needed for the management of finances such as structuring of their wealth, tax fillings, administrative services, and much more, thus hampering the overall growth of the market in 2020.

The global trust and corporate services market observed progressive growth in the past few years and anticipations are made that during the forecasted period (2023-2028), the market would further augment at an escalating growth rate. The global trust and corporate services market growth is predicted to be supported by numerous growth drivers such as escalating global GDP per-capita, growing global HNWI wealth, growing opportunity in pension assets, high client retention rate, increasing number of sovereign investors, upsurge in outsourcing, and many other factors. Conversely, the market growth would be negatively impacted by various challenges such as unstable globalization and FDI, failure of client relationship, shuddering global consumer confidence, increasing cyber threat, etc. Moreover, the market growth would succeed in various market trends like modifications in regulations, political and economic ambiguities, improvement and advancement in technology infrastructure, etc.
