Mergers and acquisitions is a key trend witnessed by the neurovascular industry worldwide in the last few years. The acquisition of prominent players like Ev3 and Micrus has changed the dynamics of the neurovascular space, giving the market a more consolidated form. In addition, various government initiatives to improve healthcare infrastructure have provided the much needed boost to the neurovascular industry. The major companies operating in this market include Stryker, Medtronic, Covidien (Ev3) and Johnson & Johnson (Micrus).

The report titled “Global Neurovascular Market: Trends & Opportunities (2013-18)” provides a detailed insight into the neurovascular market. The report analyzes the primary segments of neurovascular disorders and the causes and symptoms associated with the disorder. It also assesses the various treatments available in the market and encompasses its market as well as its segments. The report also incorporates the market share based on various technologies and companies operating in this sphere. The report primarily focuses on the two chief segments of neurovascular disorder: hemorrhagic stroke and ischemic stroke. The report further discusses the various factors driving the neurovascular market in addition to profiling the major companies operating in the market along with their business strategies and expansion plans.

Global Neurovascular Market: An Overview

The neurovascular market refers to the treatment pertaining to disorder caused in neurovascular system. The market includes the various surgeries, devices and therapies covered in the treatment of the disorder. The global neurovascular market has witness a significant growth in past few years. The huge patient population with neurological disorder has been the driving factor for this kind of growth .

Global Neurovascular Industry Market Size, By Value, 2007-12 (Billion)

Global Neurovascular Industry Market Size, By Value, 2013-18 (Billion)

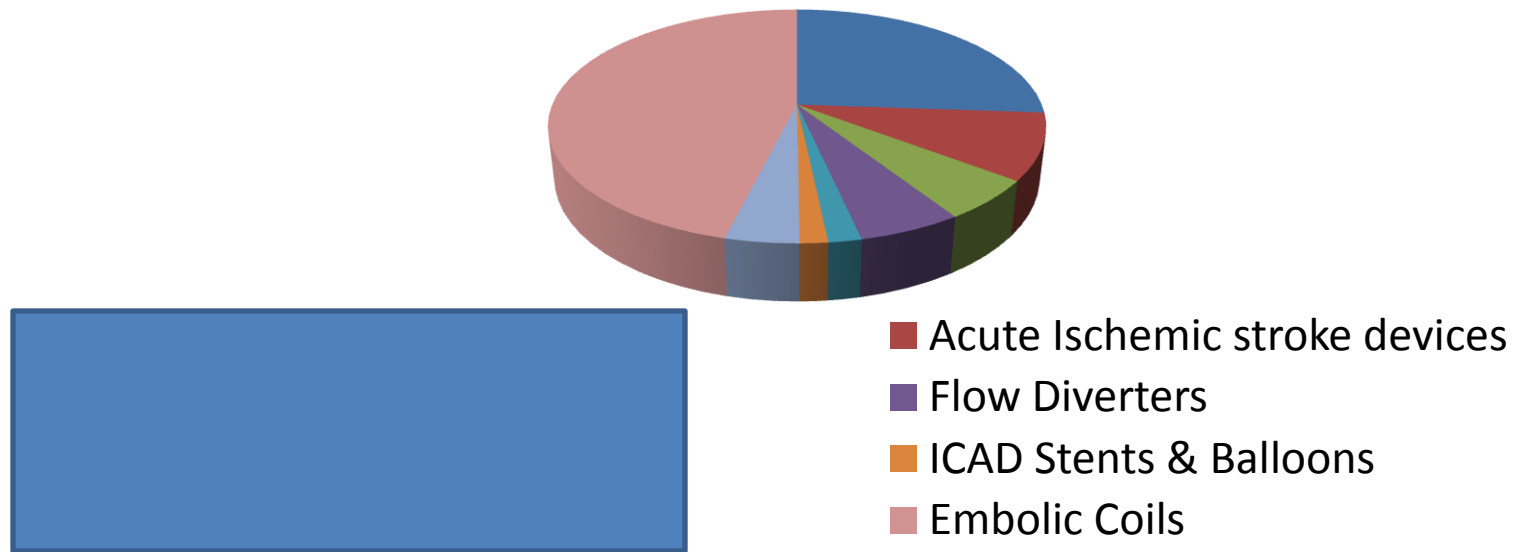

- The Global Neurovascular industry recorded a CAGR of during 2007-12.
- The industry is forecasted to attain revenue of..... Billion by the end of 2018.

Global Neurovascular Market: Overview

The Neurovascular market is witnessing mergers and acquisitions enabling the players to make a global presence and expand their product profile. In the present scenario, the vendors are focusing on product innovation and technological advancement to increase their market share in the industry.

Global Neurovascular Industry Market Share, By Technology, 2012

- Embolic Coils is the largest segment of Neurovascular industry with a market share of% in 2012.
- Flow Diverters had a market share of.....% while remodeling balloons contributed.....%.

Growth Drivers of the Neurovascular Industry

Rising number of Diabetic Patients

-
-
-
-

Increasing case of Hypertension

-
-
-
-

Rising in the Ageing Population

-
-
-
-

Illicit Consumption of Non- Prescribed Drugs

-
-
-
