Global Seafood Market

Executive Summary

Seafood is any form of sea life that is suitable for human consumption. Examples of seafood are mollusks, flatfish, crustaceans, etc. Seafood consumption has various benefits to health of an individual in the form of improved electrical properties of the heart, sharper functioning of the brain and less possibilities of unwanted clotting of blood. Atlantic Salmon in particular is a popular seafood worldwide.

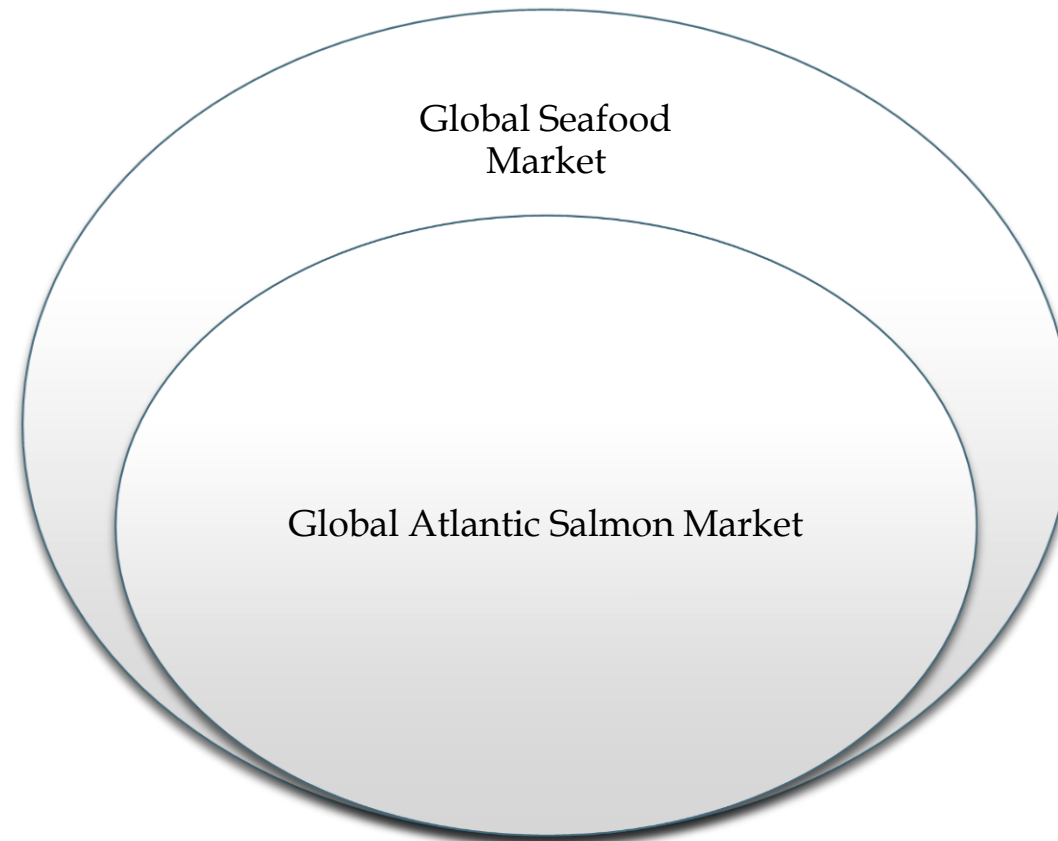

The global seafood market can be divided on the basis of type, retail market variety and sales channel. On the basis of type, the market can be segmented into Atlantic Salmon, Molluscs, Cephalopods and Flat Fish. On the basis of retail market variety, the market can be split into ambient, frozen and chilled. On the basis of sales channel, the market can be sub segmented further into retail, food service and institutional.

The global seafood market and salmon market is expected to increase at a healthy rate during the forecast period (2018-2022). The global seafood market and Atlantic salmon market is supported by various growth drivers such as increasing middle class population, upsurge in purchasing power, rising popularity of aquaculture and rise in inbound and outbound tourism.

Unexpected climatic conditions, high prices of Salmon and new regulations for Salmon production are some of the challenges faced by the market. Spike in Salmon production projects, innovations such as Fjordmax, variations in biomass levels of Salmon and growth opportunity via e-commerce are some of the latest trends in the market.
