# Global Prostate Cancer Market

## Executive Summary

Today, the cancer has become one of the widely prevailing chronic diseases that is leading cause of death and disability worldwide. Some of the most common cancer types include ovarian cancer, chronic leukemia, breast cancer and some lymphomas. It is the second leading cause of death globally. About one in six deaths worldwide is due to cancer. Ageing is one of the major factors for the development of cancer in the body.

Prostate cancer is a type of cancer that affects only men population globally. It is the second most commonly occurring cancer in men and fourth most commonly occurred cancer overall. Despite of availability of highly developed therapies the survival for advanced prostate cancer patients is quite low. The number of men diagnosed with the disease is increasingly rapidly particularly due to rising and ageing population.

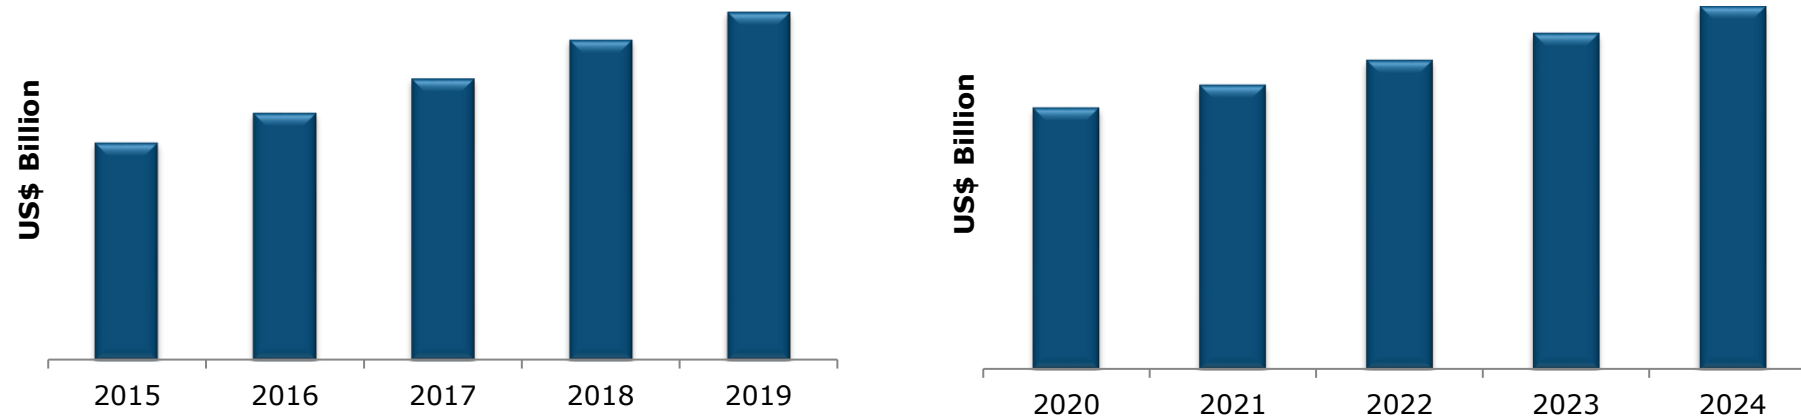

The incidence rates of prostate cancer have increased dramatically primarily due to increased availability of screening for prostate-specific agents (PSA) in men without symptoms of the disease. There are three stages of prostate cancer: Localised Prostate Cancer, Localised Advanced Prostate Cancer, and Advanced/Metastatic Prostate Cancer.

The global prostate cancer market has shown tremendous growth over the past few years and projections are made that the market would grow at a rapid pace over the forecasted period (2020-2024) as well. The aging population and altering lifestyle are the major factors contributed in the growth of market. Moreover, expanding healthcare cost, rising public awareness towards the disease, availability of generic drugs etc. would further augment market growth.

However, the market faces some challenges which are hindering the growth. Some of the major challenges faced by the industry are: increasing economic burden of the disease, side-effects associated with treatment, overdiagnosis issue etc. Though, the market growth would be further supported by various market trends like increasing use of diverse therapies, approval of novel treatments and drugs, advancements in prostate cancer research etc.
