

Global Insulin Pump Market with Focus on Patch Pumps (2017-2021 Edition)

June 2017

Global Insulin Pump Market with Focus on Patch Pumps Report

Scope of the Report

The report entitled "Global Insulin Pump Market with Focus on Patch Pumps (2017-2021 Edition)", provides analysis of the global insulin pump market with focus on patch pumps and its segments, with detailed analysis of market size and growth, market share. The report also provides the analysis of global insulin pump market with focus on patch pumps market by penetration and by segments.

The report includes the detailed analysis of the US insulin pump market. It provides detail on total diabetic population in the US with Type1 and Type2 diabetes. The US insulin pump market is measured in terms of volume and market share of top players.

Growth of the overall global insulin pump market with focus on patch pumps has also been forecasted for the period 2017-2021, taking into consideration the previous growth patterns, the growth drivers and the current and future trends.

The global insulin pump market with focus on patch pumps market is highly fragmented with various players. Medtronic, Insulet Corporation and Johnson& Johnson(Animas Corporation) and Cellnovo are some of the key players operating in the insulin pump market with focus on patch pumps , whose company profiling has been done in the report. In this segment of the report, business overview, financial overview and business strategies of the companies are provided.

Country Coverage

The US

Company Coverage

Medtronic

Insulet Corporation

Johnson& Johnson(Animas Corporation)

Cellnovo

Global Insulin Pump Market with Focus on Patch Pumps Report

Executive Summary

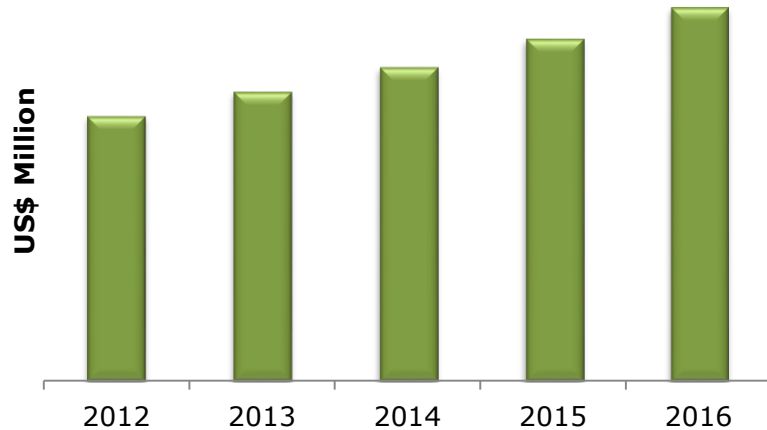

A disorder in the human body, where the amount of glucose is very high as the body is not able to properly use it. The reason behind such a metabolism disorder is the inability of pancreas to produce any insulin or not enough insulin to help glucose enter the cells in the body in order to produce energy in the body. This disorder in the human body is known as diabetes. There are mainly two types of diabetes: Type1 Diabetes and Type2 Diabetes.

A medical device that is used in for the management of insulin in the treatment of diabetes is known as insulin pump. It is a small automated device almost similar to the dimension of a mobile phone. It is very convenient in use, as this can be easily carried on a belt or inside a pocket. The device contains buttons to program insulin and navigate through the menu, LCD color screen to show the programming, battery compartment and a reservoir compartment. There are various types of insulin pumps are available in the market and the latest pump available in the market is patch pump which is technologically more advanced than traditional pumps.

The global insulin pump market has increased with a healthy growth rate over the years and is expected to increase further during the forecasted period (2017-2021). The global insulin pump market is supported by various growth drivers, increasing diabetic population, increased life expectancy, ageing population, new product innovation and expansion of global market etc. Yet, the market faces certain challenges, such as high cost of insulin pumps, threat from implantable insulin pump, invention of artificial pancreas and complicated software used in insulin pumps etc.

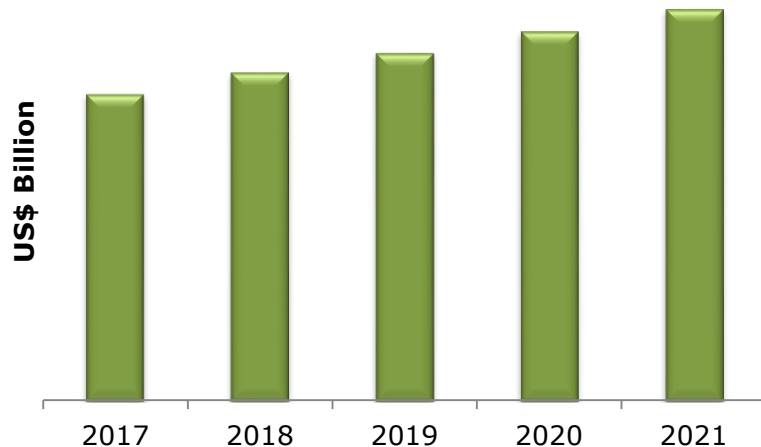

Global Insulin Pump Market with Focus on Patch Pumps Overview

Global Insulin Pump Market by Value;
2012-2016 (US\$ Million)

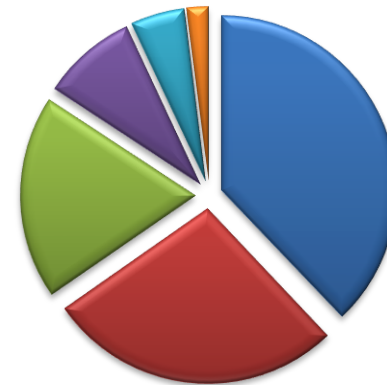

The global insulin pump market value was US\$... million in 2016, up by ...% from US\$... million in 2015. The global insulin pump market is expected to reach US\$... billion in 2021, as compared to US\$... billion in 2017, increasing at a CAGR of ...% over the years 2017-2021.

Global Insulin Pump Market by Value;
2017-2021 (US\$ Billion)

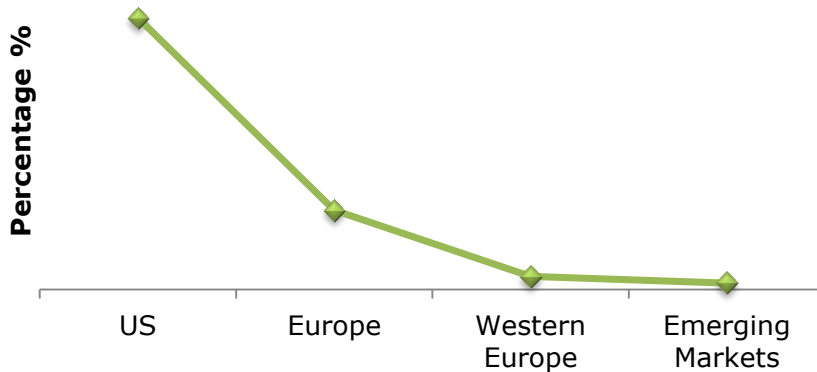

Global Insulin Pump Market Share by
Region; 2016

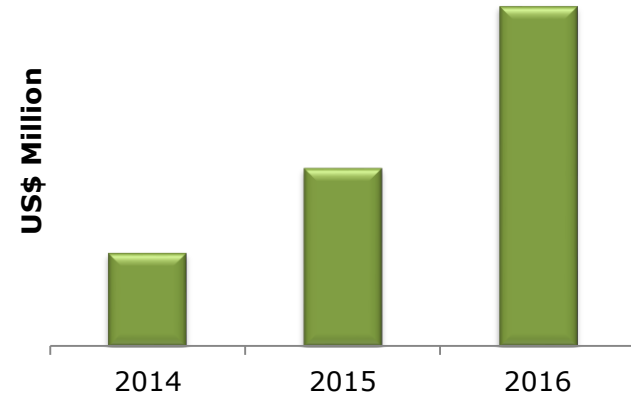

Global Insulin Pump Market with Focus on Patch Pumps Overview

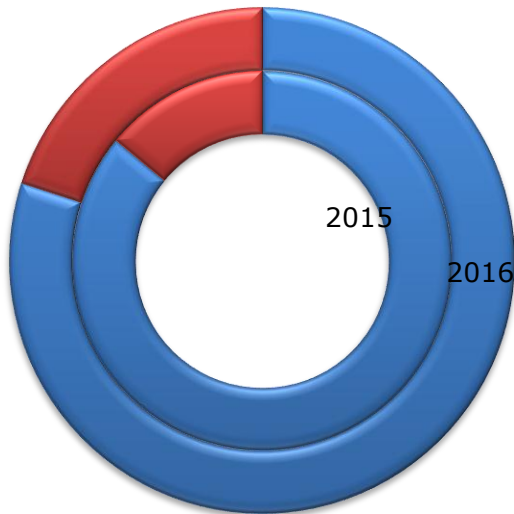

Global Insulin Pump Market by Penetration Rate; 2016 (Percentage, %)

Global Insulin Patch Pump Market by Value; 2014-2016 (US\$ Million)

Global Insulin Patch Pump by Market Share; 2015-2016

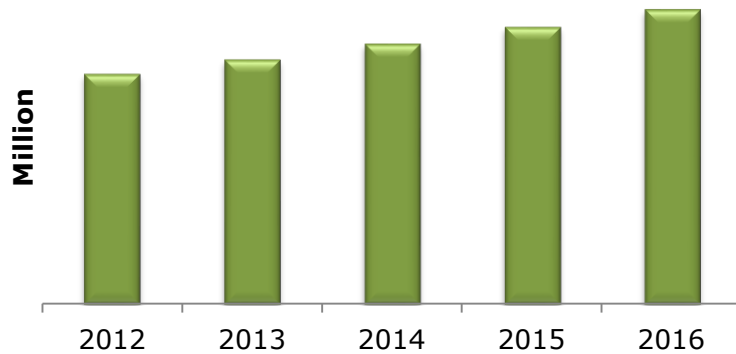

The insulin patch pump market can be segmented into two segments, such as:.....

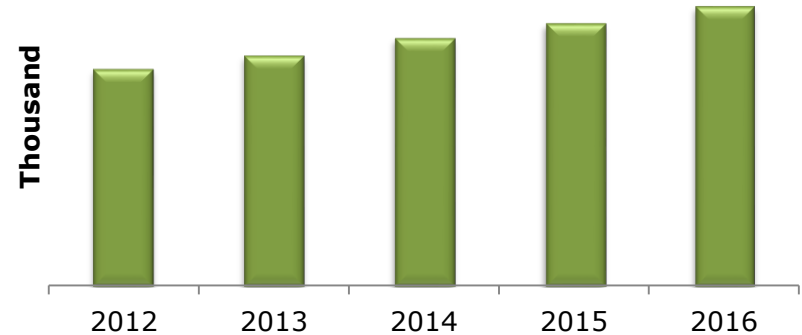

The global insulin patch pump market valued US\$... million in 2016, increased from US\$... million in 2014. The insulin patch market valued increased at a CAGR of% over the 2014 to 2016 years.

Global Insulin Pump Market with Focus on Patch Pumps: Regional Overview

The US Diabetes Population; 2012-2016 (Million)

The US Insulin Pump Market by Number of Users; 2012-2016 (Thousand)

The US diabetes population was ... million in 2016, increased from ... million in 2015 with a growth of ...%. The maximum population growth rate ...% was noticed in 2014 and 2016 years, the lowest population growth rate ...% was in 2012. The US insulin pump market has ...thousand users in 2015, the number of pump users was increased and reached to ... thousand in 2016.

The US Insulin Pump Market by Top Players Share; 2015
