Global Board Portal Market

Executive Summary

A board portal is a secure online tool for the directors of an organization to access their key corporate documents. In recent years, board portals have progressed from being a luxury item used by a few early adopters to a necessary communication and collaboration tool. A board portal offers private and privileged access to board materials, and provides tools that make preparation of key documents and organization of meetings easier for administrators. The board portal is used on a number of devices such as tablet and mobiles so that it can be readily available at any time.

The board portals can be segmented by delivery modes as well as delivery models. Board portal software can be used through Android, i-pad web based tools or windows. Vendors offer their products in the market through one of these mediums. A delivery model refers to the approach taken for delivering enterprise software mainly used while referring to a software application. Three primary delivery methods are used for enterprise software, namely, licensed model, software as a service (SaaS) model and a hosted model.

The board portals can be segmented on the basis of Generations as well into Gen 1.0, Gen 2.0, Gen 3.0 and Gen 4.0. Over the generations, the board portals have become much simpler, technically advanced and have become more of digital assistants to the board members.

The Gen 4.0 board portal is an expectation that what an ideal board portal should be like.

The acceptance and use of board portal have increased significantly over the years. The global portal market is projected to grow at a significant growth rate over the forecasted period i.e. 2018 to 2022. The factors driving the global board portal market are increasing security concern in the organization, better collaboration between directors, lower cost of board portal solutions, growing trend of paperless board meetings, etc. Yet there are some challenges which this market faces, such as balancing security issue, regulatory compliance, lack of skilled workforce, etc.
