Global Attention-Deficit Hyperactivity Disorder (ADHD) Market: Coverage

Scope of the Report

Attributes	Details
Title	Global Attention-Deficit Hyperactivity Disorder (ADHD) Market: Size, Trends & Forecasts (2019-2023)
Coverage	Global and Regional
Regional Coverage	North America, Europe, Asia-Pacific, Middle East and Africa, Latin America
Market Influencing Variables	Growth Drivers, Challenges, Market Trends
Forecast Period of Market	2019-2023
Competition in the Market	Fragmented
Key Players	Johnson & Johnson, Pfizer Inc., Eli Lilly and Company, Takeda Pharmaceutical Company Limited (Shire Plc)

Global Attention-Deficit Hyperactivity Disorder (ADHD) Market

Executive Summary

ADHD is a complex neurological disorder which creates difficulty for a person in paying attention and in controlling their behavior. The symptoms of ADHD might vary from person to person, but the most common symptoms include restlessness, difficulty in paying attention, hyperactivity, frequent mood swings and difficulty in coping with stress. A person diagnosed with ADHD can suffer from the hyperactive-type, inattentive type or the combined type attention deficit disorder.

The most common factors which cause the attention-deficit hyperactivity disorder in people include exposure to environmental toxins such as high levels of lead at a young age, low birth weight, genes, brain injuries, etc. ADHD can be treated with the use of medication, therapy, education and training or a combination of these treatments.

ADHD has been segmented on the basis of medication type, therapy, age group and distribution channel. The two major kinds of medication for the treatment of ADHD are stimulants and non-stimulants. Various kinds of therapies for ADHD include behavior therapy, cognitive behavioral therapy, interpersonal therapy and family therapy. On the basis of age group, ADHD has been segmented into pediatric, adolescent and adult and the major distribution channels for ADHD are retail pharmacy and hospital pharmacy.

The global attention-deficit hyperactivity disorder (ADHD) market has witnessed continuous growth in the past few years and is projected to grow even further during the forecast period (2019-2023). The market is expected to be driven by various growth enhancing factors such as rising healthcare expenditure, excessive use of smartphones, increasing investments in mental health technology, growing impact of social media, etc. Some of the major challenges faced by the market are misuse of drugs used in the treatment of ADHD and high cost of ADHD treatment.
