Global Allergy Immunotherapy Market: Coverage

Scope of the Report

Attributes	Details
Title	Global Allergy Immunotherapy Market: Size & Forecast with Impact Analysis of COVID-19 (2020-2024 Edition)
Coverage	Global and Regional
Regional Coverage	Europe, The US, Rest of the World
Market Influencing Variables	Growth Drivers, Challenges, Market Trends
Forecast Period of Market	2020-2024
Competition in the Market	Dominated
Key Players	Allergy Therapeutics PLC, ALK-Abelló A/S, Dermapharm Holding SE (Allergopharma GmbH & Co. KG), Stallergenes Greer

Global Allergy Immunotherapy Market

Executive Summary

Allergy refers to a condition in which the immune system abnormally reacts to the foreign substance. The foreign substance could be in the form of particular food, pollen, pets, metals, fur, dust, etc. to which the body becomes hypersensitive when comes into contact. The foreign substance that triggers the hypersensitive response in the body is known as an allergen. Generally, most substances that cause allergies are normally harmless to the human body and have no effect on the vast majority of people that are not allergic. Allergy is not a disease, it is a mere over-reaction of body to the foreign substance that is not harmful. To diagnose, an allergy skin test, blood test and allergy component tests are undertaken. Allergies are generally seasonal and perennial in nature.

Allergen immunotherapy, also known as “allergy shots”, is a form of long-term treatment that decreases symptoms for many people with allergic rhinitis, allergic asthma, conjunctivitis (eye allergy) or stinging insect allergy. Immunotherapy involves exposing people to larger and larger amounts of allergen in an affect to change the immune system's response. Allergy immunotherapy is an established treatment for severe allergies such as allergic rhinitis and allergic asthma. The allergy immunotherapy can be classified on the basis of method of administration: subcutaneous (SCIT), sublingual (SLIT-tablets/drops) and whole allergen. The allergy immunotherapy market can be segmented on the basis of method of administration; allergy type; and distribution channel.

The global allergy immunotherapy market has increased at a significant CAGR during the years 2015-2019 and projections are made that the market would rise in the next four years i.e. 2020-2024 tremendously. The allergy immunotherapy market is expected to increase due to increasing level of air pollution, growing industrial activities, escalating healthcare spending, rapid urbanization, rising prevalence of allergic diseases, etc. Yet the market faces some challenges such as high cost involved, side effects associated with allergy immunotherapy, etc.

Allergy Immunotherapy Market: Global Analysis

Global Allergy Immunotherapy Market by Value

CAGR	
2015-2019	xx%
2020-2024	xx%

The global allergy immunotherapy market, valued at US\$... billion in 2019, increased as compared to US\$... billion in 2018, increasing at a CAGR of% over the years 2015-2019.. The global allergy immunotherapy market is anticipated to reach up to US\$... billion by 2024 from US\$... billion in 2020, increasing at a CAGR of% from 2020 to 2024..

Allergy Immunotherapy Market: Global Analysis

Global Allergy Immunotherapy Market by Region; 2019

Global Allergy Immunotherapy Market by Method of Administration; 2019

Method of Administration	Share
Subcutaneous	xx%
Sublingual Solution	xx%
Sublingual Tablet	xx%

Allergy Immunotherapy Market: Global Analysis

Global Allergy Immunotherapy Market by Allergy Type; 2019

Allergy Type	Share
Allergic Rhinitis	xx%
Asthma	xx%
Food Allergy	xx%
Skin Allergy	xx%
Eye Allergy	xx%
Other Allergies	xx%
