# Global Carboxy Therapy Market: Coverage

## Scope of the Report

Attributes	Details
Title	Global Carboxy Therapy Market: Analysis By Type (Tabletop, Portable and Others), By Application (Aesthetic Medicine, Dermatology, Gynecology, Angiology, Orthopedic, Sports Medicine and Others), By End User (Hospitals, Aesthetic Clinics and Med Spas and Wellness Centers), By Region Size and Trends with Impact of COVID-19 and Forecast up to 2028
Coverage	Global and Regional
Market Influencing Variables	Growth Drivers, Challenges, Market Trends
Forecast Period of Market	2023-2028
Competition in the Market	Fragmented
Key Players	DTA Medical, Cosmo Pro, Carbositerapia Italiana, Beijing Jontelaser Technology Co., Ltd., Kastner-Praxisbedarf GmbH, MezoPharma, ALVI PRAGUE, Nik Fanavaran Plasma

# Global Carboxy Therapy Market: Coverage

## Executive Summary

Carboxy Therapy is the treatment of injecting carbon dioxide gas underneath the skin. This treatment is used to reduce cellulite, stretch marks, and dark circles under the eyes. It can also be used as part of treatment for wound healing. Carbon dioxide brings additional oxygen into the area and dilates the blood vessels where it is injected to improve the overall appearance of your skin. The growth of carboxy therapy is driven by several factors, including the rising demand for anti-aging solutions, increase in disposable income, and growing incidence of skin disorders and hair loss. The global carboxy therapy market in 2022 stood at US\$95.64 million, and is likely to reach US\$191.32 million by 2028.

The carboxy therapy market can be segmented on the basis of type (tabletop, portable and others), application (aesthetic medicine, dermatology, gynecology, angiology, orthopedic, sports medicine and others), and end user (hospitals, aesthetic clinics and med spas and wellness centers). On the basis of type, the tabletop segment dominated the market share in 2022 as it is suitable for high-volume practices where carboxytherapy is a primary offering. Also, enhanced precision, versatility, and the ability to handle a heavy workload drive tabletop machines' demand in clinical settings. On the basis of region, North America accounted for the largest share as there is a significant increase in the geriatric population and the changes in beauty standards on a regional level have increased the demand for antiaging treatments to reduce fine lines and wrinkles.

The COVID-19 pandemic had negative impact on the global carboxy therapy market. As, hospitals and clinics postponed or canceled elective procedures and non-essential treatments, including many cosmetic and aesthetic procedures like carboxytherapy. This led to a decline in the demand for such services during pandemic. However, the post-COVID impact on the carboxy therapy market is expected to result in increased demand for treatment as healthcare facilities adapted to new safety protocols, patients who had delayed elective treatments during the pandemic started seeking these services again. The pandemic also underscored the importance of health and well-being for many people. As a result, there was an increased interest in self-care and maintaining one's appearance.

The global carboxy therapy market has increased in 2022 and projections are made that the market would rise in the next five years i.e. 2023-2028 tremendously. The increased demand for anti-aging solution, rising disposable income, growing incidence of skin disorders and hair loss, increasing demand for non-invasive procedures, proliferating aesthetics service outlet and versatile applications has driven global demand for management consulting. Further, the market is expected to grow owing to technological advancements, availability of portable and compact devices, sustainability and eco-friendly practices, growing awareness through social media and growing popularity among emerging nations.

# Carboxy Therapy Market: Global Analysis

## Global Carboxy Therapy Market by Value

Global Carboxy Therapy market valued at US\$... billion in 2022, increased as compared to US\$... billion in 2021. Global Carboxy Therapy market is anticipated to reach up to US\$... billion by 2028, at a CAGR of ....%, from US\$... billion in 2023.
